

FEATURES

- -55°C to $+125^{\circ}\text{C}$ operation
- 16 TO 40 VDC input
- Four fully regulated outputs
- Internal EMI filter meets MIL-STD-461C CE03
- Active transient suppressor
- Built in hold-up function with flag
- Fully isolated
- Magnetic feedback
- Fixed frequency, 550 kHz typical
- Topology – Single Ended Forward
- Inhibit function
- Indefinite short circuit protection
- Undervoltage lockout

DC/DC CONVERTERS

28 VOLT INPUT

Size (max.): 3.200 x 2.600 x 0.460 inches (81.28 x 66.04 x 11.68 mm)

See Section B8, case N, for dimensions.

Weight: 120 grams typical

Screening: Standard or ES. See Section C2 for screening options, see Section A5 for ordering information.

MQO SERIES

± 5 and ± 15

DESCRIPTION

The MQO Series™ of DC/DC converters supply up to 16.5 watts in a four output configuration of ± 5 and ± 12 or ± 5 and ± 15 VDC. An integral EMI filter and transient suppressor allow the converters to meet MIL-STD-461C standards without external components. An output hold-up feature provides a low power flag and full output power hold-up through transient dropout conditions.

The MQO Series converters are packaged in hermetically sealed cases and are rated for full power operation from -55° to $+125^{\circ}\text{C}$ case temperature. This makes these units ideal for military, aerospace, and hi-rel industrial applications.

A high gain bandwidth magnetically isolated control loop is used to precisely regulate the +5 VDC output. Constant frequency pulse width with a single ended forward topology is used. The -5 VDC output and the auxiliary outputs are independently controlled with low headroom regulators, eliminating cross regulation errors. The use of feedforward, compensation, and a high gain bandwidth control loop provides excellent rejection to the conducted audio spectrum of MIL-STD-704A-D and MIL-STD-461C.

INTEGRAL EMI FILTER

The MQO Series includes a built-in EMI filter and transient suppressor which allow the units to meet the most common military standards without any external components. The internal EMI filter provides both differential and common mode attenuation on the

input power lines to allow meeting the CE03 interference and CS02 susceptibility requirements. The active internal transient suppressor provides protection against MIL-STD-704A, 1275, and 461C line transients. Protection is provided for transients up to 400 V from a 0.5 ohm source and 600 V from a 50 ohm source.

BUILT-IN HOLD-UP FUNCTION WITH FLAG

An output hold-up feature provides a low power flag and full output power hold-up through transient drop out conditions. At full load for a V_{in} step from 28 to 0 volts, the minimum hold-up time will be 50 μs . The low power flag (TTL high) is asserted 10 μs before the end of the hold-up time. External capacitance can be added to extend hold-up time.

SHORT CIRCUIT PROTECTION

MQO Series converters provide predictable current limiters which directly sense output load current in the converter's secondary. During short circuit or overload conditions, the current limiters provide constant output current and an input power fold-back.

UNDERVOLTAGE LOCKOUT

Undervoltage lockout prevents the converters from operating below approximately 12 VDC input voltage which helps keep system current levels smooth, especially during initialization or re-start operations.

DC/DC CONVERTERS

ABSOLUTE MAXIMUM RATINGS	
Input Voltage	• 16 to 40 V
Output Power	• 16.75 watts
Lead Soldering Temperature (10 sec per lead)	• 300°C
Storage Temperature Range (Case)	• -65°C to +150°C

INHIBIT	
Inhibit TTL Open Collector	• Logic low (output disabled)
	• Referenced to input common
	• Logic high (output enabled)
	Open collector

TYPICAL CHARACTERISTICS	
Undervoltage Lockout	• 12 V input typical
Isolation	• 100 megohm minimum at 500 V
Audio Rejection	• Up to 50 dB
Conversion Frequency	• 550 kHz typical

RECOMMENDED OPERATING CONDITIONS	
Input Voltage Range	• 16 to 40 VDC continuous
Case Operating Temperature (Tc)	• -55°C to +125°C full power
	• -55°C to +135°C absolute
Derating Output Power/Current	• Linearly from 100% at 125°C to 0% at 135°C

Electrical Characteristics: 25°C Tc, 28 VDC Vin, 100% load, unless otherwise specified.
