◆ Recommendation for Press fit Board Assembly

If boards are furnished from the users, HIROSE will assemble the connectors.

Please confirm following requirements.

- ① Board size: 600 x 600mm max.
- ② Board through-hole pitch

The board punching bench is designed in the 2.54mm pitch grid. Set the through-hole pitch to pitch (connector side) size to 2.54 x n.

- ③ Connector punching surface indication

For indication on the connector punching surface, mark "FRONT" or "F", and "BACK" or "B" on the reverse side in order to clearly identify the front and rear sides. In addition, the punching direction should be clearly marked.

- ④ Clearly indicate the board No. and marking position.
- ⑤ Clearly indicate board mounting hole positions and hole diameters.

In addition, we provide the press fit board assembly from the both sides, For further information, consult HRS company.
